

# TAMRO WEB ANALYSIS (TWA)

Which of your products are currently in stock at Tamro? Has a specific product arrived? Which pharmacies are waiting for back orders? How are sales going in the various districts – district by district or compared with last year? What level of service have you been offered pharmacies this month (key figures) compared with previous months?

## SEE IT FROM A DIFFERENT ANGLE

Tamro Web Analysis is a comprehensive, internet-based information system for stocks and sales. No matter where you are, you can access current figures in the form of sales statistics, stock balances, stock events, back orders and current key figures every morning.

### Business analysis

TWA gives you up-to the-minute business analysis of information in a number of different dimensions. You can decide whether to have analyses presented as tables or graphs, analyse online, export to Excel or PDF, print them out as hard copy or save them as links.

### Version to match requirements

TWA is available in two versions: a complete version for large and medium-sized business and a scaled-down version, adapted for smaller companies.

### Outstanding tool

TWA is an outstanding tool for marketing and sales managers, consultants, logistics specialists, controllers and financial managers.
